CONTENTS OF VOLUME 25

Number 1

J. A. Hudson 1 Silver Jubilee Editorial

B. Amadei 3 Strength of a regularly jointed rock mass under biaxial and axisymmetric loading conditions

M. Wu and H. F. Wang 15 Influence of nearby fractures on stress measurements by hydraulic fracturing

D. F. Howarth and W. R. Adamson 25 Performance characteristics of a small scale rotary boring machine instrumented with large drag picks

Technical Notes

D. F. Howarth and E. J. Bridge 35 Microfracture beneath blunt disc cutters in rock

D. F. Howarth and E. J. Bridge 39 Observation of cracks at the bottom of percussion and diamond drill holes

Shixiong Zhang and Guangxu Tong 45 Computerized pole concentration graphs using the Wulff stereographic projection

F. A. Vreede 53 A general slip model for rock mechanics

Announcements 57 5th International Symposium on Ground Freezing

12th Canadian Congress of Applied Mechanics—*CANCAM '89*

Geomechanics Abstracts 1A

Number 2

M. Oda 59 An experimental study of the elasticity of mylonite rock with random cracks

International Society for Rock Mechanics. Commission on Testing Methods
F. Ouchterlony (Co-ordinator) 71 Suggested methods for determining the fracture toughness of rock

Technical Note

P. J. Périé, R. E. Goodman and T. J. Doe 97 Simulation of borehole breakouts in a model material

Geomechanics Abstracts 53A

Number 3

Computers, Rock Mechanics and Rock Engineering

C. Fairhurst v Foreword

A. M. Starfield and P. A. Cundall 99 Towards a methodology for rock mechanics modelling

P. A. Cundall 107 Formulation of a three-dimensional distinct element model—Part I. A scheme to detect and represent contacts in a system composed of many polyhedral blocks

R. Hart, P. A. Cundall and J. Lemos 117 Formulation of a three-dimensional distinct element model—Part II. Mechanical calculations for motion and interaction of a system composed of many polyhedral blocks

D. Heliot 127 Generating a blocky rock mass

D. Lin and C. Fairhurst 139 Static analysis of the stability of three-dimensional blocky systems around excavations in rock

S. L. Crouch and Y. Tian 149 A two-dimensional direct boundary integral method for elastodynamics

I. Vardoulakis, J. Sulem and A. Guenot 159 Borehole instabilities as bifurcation phenomena

E. Detournay and A. H-D. Cheng 171 Poroelastic response of a borehole in a non-hydrostatic stress field

Geomechanics Abstracts 105A

Number 4

Rock Engineering Software

A Survey of Computer Programs in Rock Mechanics Research and Engineering Practice

A Report Compiled by the ISRM Commission on Computer Programs
Commission President: **Dr-Ing. B. Plischke**

Foreword iii
Section 1: Introduction 183
Section 2: Static stress and deformation analysis by finite element methods 185
Section 3: Static stress and deformation analysis by alternative techniques 217
Section 4: Stability analysis according to rigid body assumptions 224
Section 5: Flow/heat conduction and diffusion analysis 229
Section 6: The solution of dynamic problems 237
Section 7: Evaluation of rock mechanics tests and field investigation data 240
Section 8: Index to applications and capabilities 246
Section 9: Other sources of geotechnical computer programs 251
Questionnaire 252

Geomechanics Abstracts 155A

Number 5

K. Sato and Y. Fujii 253 Induced seismicity associated with longwall coal mining

G. L. Prost	263	Jointing at rock contacts in cyclic loading
K. G. Sharma and G. N. Pande	273	Stability of rock masses reinforced by passive, fully-grouted rock bolts
C. H. Dowding, M. B. Su and K. O'Connor	287	Principles of time domain reflectometry applied to measurement of rock mass deformation
A. Taliercio and G. Sacchi Landriani	299	A failure condition for layered rock
C. Bandopadhyay, P. R. Sheorey, B. Singh and A. K. Ghose	307	Stability of parting rock between level contiguous coal pillar workings
Technical Notes		
P. R. Sheorey	321	Estimation of gain in pillar strength due to bolting
S. Harpalani	327	Specimen preparation for testing coal properties
X. D. Pan and J. A. Hudson	331	Plane strain analysis in modelling three-dimensional tunnel excavations
A. Vervoort	339	Convergence of the roof and floor in longwall faces
F. O. Otuonye	345	Response of grouted roof bolts to blast loading
Corrigendum	351	
Geomechanics Abstracts	203A	

Number 6

C. L. Smither, D. R. Schmitt and T. J. Ahrens	353	Analysis and modelling of holographic measurements of *in situ* stress
J. A. Hudson and C. M. Cooling	363	*In situ* rock stresses and their measurement in the U.K.—Part I. The current state of knowledge
C. M. Cooling, J. A. Hudson and L. W. Tunbridge	371	*In situ* rock stresses and their measurement in the U.K.—Part II. Site experiments and stress field interpretation
K. Sepehr and B. Stimpson	383	Potash mining and seismicity: a time-dependent finite element model
D. J. Gates	393	A microscopic model for stress–strain relations in rock—Part I. Equilibrium equations
D. J. Gates	403	A microscopic model for stress–strain relations in rock—Part II. Triaxial compressive stress
J.-P. Petit	411	Normal stress dependent rupture morphology in direct shear tests on sandstone with applications to some natural fault surface features
P. R. La Pointe	421	A method to characterize fracture density and connectivity through fractal geometry
V. R. Shea and D. R. Hanson	431	Elastic wave velocity and attenuation as used to define phases of loading and failure in coal
K.-G. Hinzen	439	Modelling of blast vibrations

International Society for
Rock Mechanics. Commission on
Testing Methods
K. Sassa (Co-ordinator) 447 Suggested methods for seismic testing within and between boreholes

Technical Notes
A. T. Spathis 473 A biaxial viscoelastic analysis of hollow inclusion gauges with implications for stress monitoring

E. A. Eissa and A. Kazi 479 Relation between static and dynamic Young's moduli of rocks

Geomechanics Abstracts 261A

Vol. 25 Supplement

The International Society for Rock Mechanics List of Members 1988 was produced as a Supplement to the journal during 1988. It was supplied to all subscribers with their copy of Volume 25 Number 5.
